

First Aid and Camp Support Specialists

Polar Medical Services is a company committed to providing excellent First Aid and Camp Support Staff to our clients.

Polar Medical Services began providing first aid and camp support services to the mining in 2005, and since then has branched out to other sectors. Senior Management has 9 years experience in the Oil and Gas industry.

Our client base includes companies involved in mining and mining exploration, construction, oil and gas, forestry, First Nations, and the BC Government (Ministries of Transportation and Infrastructure, BC Forest Service, BC Hydro).

We have worked throughout northern and western Canada, specifically British Columbia, Alberta, Northwest Territories, Nunavut, and Yukon.

Polar Medical Services understands that key to our success is our qualified employees, for today and in the future. Our team is a close-knit, professional and experienced group of individuals who pride themselves on providing excellent service.

Most First Aid employees with Polar Medical Services have an average

of 10 years experience as a Level 3 Occupational First Aid attendant. Polar Medical staff has training with TDG, H2S and WHMIS. Polar Medical Services is striving to have our employees at EMP or EMR level.

The majority of our staff lives locally. We also strongly believe in and actively integrate local people as part of the project. We take the extra time to support and train local hires so that they can be successful within the Polar Medical Services team.

Our current fleet is comprised of newer 4x4 F350 diesel pickups outfitted with Mobile Treatment Centers (MTCs) as well as safety boxes containing emergency road equipment sufficient to handle most situations encountered, while traveling remote roads.

Our trucks are fully stocked with up-to-date equipment to First Aid Room standards. We are in full compliance with National Safety Code and WCB criteria for Mobile Treatment Centers.

We also provide a complete line of up-to-date communication equipment including mobile phones and radios, satellite phones and internet satellite systems.

Polar Medical Services Strengths:

- Logistics and Pre-Planning
- On-going staff supports
- Integrating local hire with the project
- Training and Field Experience of the Polar Team

We at Polar Medical Services would like our clients to know that we have the knowledge, equipment and staff to accomplish your needs.

We will strive to better ourselves, our employees, and all working relationships with our clients and the communities, which we work in, not only today, but in years to come.

Outstanding Safety Record

Polar Medical Services believes that the safety performance of our company is a key to your success. Polar Medical Services has an outstanding safety record, with zero incidents since it began full operations in 2005. Polar Medical Services is in full compliance with IRP16 and all regulatory authorities.

Polar Medical Services has made its Safety Management System available on-line. The SMS tracks compliance for the various components of our safety program such as policies acknowledged, procedures reviewed, and training courses completed.

We have an 'Employee Safety Portal' which provides a full organization Chart and a Contact List. The Portal provides for the posting of our Mission Statement, Safety Bulletins and Alerts, Safe Operating Procedures, as well as a complete Company Safety Manual.

It also allows our employees to access our on-line Continuing Education Program which currently covers 28 topics (a total of 113 lessons) including but not limited to Commercial Vehicles, Emergency Preparedness, Hazard Management, Safety Supervision, and WCB.

Services for the Client

Polar Medical Services can tailor our services to meet your needs.

We provide Camp Management Staff from construction to shut-down including:
